AIM AND SCOPE

ICOME'20 meeting is dedicated to cutting edge research that addresses scientific needs of academic researchers, industrial and professionals to explore new horizons of knowledge onto various topics in interlink between materials and energy fields.

Our Conference will host Keynote and Symposium sessions that will be dedicated to several fields.

INTERNATIONAL PUBLICATION

After a reviewing procedure, papers will be published in our edited proceedings. High quality papers will be selected for international publication in several relevant journals.

INTERNATIONAL CONFERENCE ON MATERIALS & ENERGY

ICOME TOPICS

Papers on all aspects coupling Energy and Materials, both fundamentals and applied, will be welcome. The ICOME'20 main topics are :

- Recent Developments on Innovative Materials.
- Bio-Based Material/ Wood/ Energy.
- Phase Change Materials for Energy Storage.
- Heat and Mass Transfer in Building Materials.
- Drying, Imbibition and Shrinking.
- Materials and Structures Durability.
- Computational Methods for Materials & Energy.
- Micro- and Nano- Structured Systems.
- Transport in Porous Media.
- Bioclimatic Architecture.
- Energy Systems/ Efficiency/ Solar/ Biomass.
- Double Diffusive Convective Coupling.
- Reactive Flow / Materials & Combustion.
- Inverse Problems and Optimization.
- Environmental Engineering / Benchmarking and Validation.
- Classical Heat and Mass Interlink Problems.
